

Universal Wall / Pole Bracket

Part No 1005

The Universal wall & pole brackets, when combined with our GRP Cut Out Boxes, offers an excellent lantern bracket and cut out point. The unit has a specially designed backplate which is suitable for wooden pole, wall and corner mounting. It also has two sets of slots for tespa band fixing to poles as an alternative to screws.

The backplate is designed to accept the universal swivel arm which can turn in the case of accident, as shown below. The arm is 0.75 m outreach with a 42mm diameter spigot with 5 degree uplift. Note that the arm can swivel through 180 degrees and has adjustable mounting height as it can slide in the stirrup.
