

Belisha Beacon AVG 4 Package

This Package consists of the re-designed AVG 4 Gallery an Amber Globe, Brass ES Lamp-holder and LED CR Cel-star 3 Flashing lamp.

AVG4 Anti-Vandal Gallery

This re-designed AVG, is a cast aluminium gallery that holds the Polyethylene globe in place. It fits on to a standard 76mm pole and is secured via 3 hidden grub screws. The AVG has allocated space for the addition of a Halo, Pedestrian Spotlight and Photocell.

The AVG4 Gallery is IP54 rated, Cast Aluminium Black (RAL9005) powder coated finish gallery and the blanking plates are nylon finished in black (RAL9005).

AVG4 Amber Globes

The AVG4 Amber globes are 300mm diameter.

Our globes are made from MDPE Polyethylene, a material that has UV protection that is resistant to fading and degradation from sunlight and typically has a 7 Year UV resistance. This means after 7 years the plastic has 50% of the original strength, after a further 7 years, this will half again.

The globe is connected to the AVG4 via a locking mechanism and screws to secure in place.

The globe is illuminated via a CELstar3.

The connection between the Globe and the AVG is capable of withstanding water and dust to IP54 standard.
